

Learning Links Foundation has been implementing the School Enhancement Program for the past 1 year in the Government Senior Secondary School, Karterpuri, Palam Vihar and the objectives of the Programs is to

- Enhance learning outcomes of students
- Kindle scientific temperament and encourage competitive spirit
- Leverage technologies for developing 21st century skills

Towards achieving the above objectives, a number of activities have been taken up in the school and one of the major steps was to encourage students to take part in the prestigious examinations like the Olympiads to develop the competitive spirit amongst the students.

Success in National Science Olympiad:

As the part of this initiative **96 students were encouraged to enrol for National Science Olympiad examination**. The resource persons of LLF conducted special classes to these **96 students post school hours for the past four months** (Sep 2013 to Dec 2013). **Special attention was given to these students** to understand the abstract concepts in Science and Math. The Foundation **procured the practice question papers and textbooks of NSO** to help them in their preparation.

As a result of four months training and the effort put in by the students **38 students out of 96 enrolled have cleared the first level of examination**. This is the first time in the history of the school and the short listed students would be appearing for the second level of examination in the month of February 2014.

The Foundation also encouraged the students to take part in International Math Olympiad but the students were unable to pay the registration fee of Rs. 85 per each. The Foundation took the initiative forward and paid **the registration fee**. 63 students would be participating in IMO and LLF is conducting special classes to these students post school hours on a daily basis.
